Confluent Education Self-Paced Subscription

For individuals seeking Training on an ongoing basis, the Self-Paced Subscription is the most flexible, effective and economical solution. Access to our comprehensive curriculum develops the skills required to address and overcome a broad spectrum of business issues as they arise.

Overview

The Self Paced Subscription unlocks immediate access to the entire library of self-paced content, which includes Lab access, with the roll out of new self-paced content being accessible immediately upon release. Being able to engage with content whenever, and from wherever, allows for the most flexible and effective approach to learning at any level.

In addition to training courses, Subscribers will get one (1) Confluent Certification voucher good for one (1) exam attempt. A great opportunity to validate your expertise in event streaming!

Introductory Course			
Confluent Fundamentals for Apache Kafka®	Learn about Apache Kafka® and the Confluent platform, including an overview of Kafka's core concepts.		
Administrator Track Courses		Developer Track Courses	
Apache Kafka® Administration by Confluent	Learn to build and manage Kafka clusters using industry best practices developed by the world's foremost Kafka experts.	Confluent Developer Skills for Building Apache Kafka®	Learn to build an application that can publish data to, and subscribe to data from, a Kafka cluster.
Confluent Advanced Skills for Optimizing Apache Kafka®	Learn how to monitor, troubleshoot, and tune a real-time event streaming platform built with Kafka.	Confluent Stream Processing Using ksqlDB & Apache Kafka® Streams	Learn how to use Confluent ksqlDB to transform, enrich, filter, and aggregate streams of real-time data using a SQL-like language.
Manage Access to Confluent Platform with Role Based Access Control	Learn how Confluent's RBAC allows Confluent Platform ("CP") integration with an existing directory service, and manage CP resources at scale.	Create and Event Streaming App with ksqlDB	Learn to develop an event streaming app with ksqlDB, one that immediately responds to events allowing for the capture of real-time insights.
Apache Kafka® Client Authentication with LDAP	Learn how Kafka client applications can authenticate to Kafka using simple LDAP username and password credentials.	Write a Source Connector	Looking for a connector that doesn't exist? Learn how to write a source connector using the Kafka Connect framework.
