

# **Verification Test Checklist and Results: Gold verifications using Kafka Connect**

[Documentation](#)

[Functionality](#)

[Internals and Supportability](#)

[Testing](#)

[Overall](#)

[Appendix](#)

## Revision History

Versions	Date	Author	Description

## Documentation

1. Connect version API used
2. Confluent Platform Supported Versions
3. Partner Product Supported Versions included in this integration
4. Supported Data Types
5. Schema Evolution Compatibility Policies
6. Configurations
7. Quickstart Guide / Tutorial

## Functionality

1. Usable with Avro / JSON converters?
2. Usable with Single Message Transforms (SMT)?
3. Exactly-Once support?
4. Configurable?

## Internals and Supportability

1. Error Handling?
2. Logging?
3. Metrics
4. Graceful Back-off
5. Packaging

## Testing

1. Unit Tests
2. System Tests
3. Confluent Platform Integration Tests
4. Performance Tests
5. Confluent Hub CLI

## Overall

1. Implements Kafka Connect?
2. Source or Sink?
3. Detail behind full support (contact info, how to obtain, etc)
4. Technical and Business Contacts
5. License

## Appendix

For every assertion made above, provide or attach detail that illustrates it and can be used to verify or reproduce the test or assertion.
